

FIRE PIT BASE ASSEMBLY

1. Place large ring on flat surface (screw holes facing up). Remove and use the screws that are in place. Attach (4) legs as shown in detail drawing.

IMPORTANT: Leave every screw loose until all parts are aligned and attached.

2. Add small ring - align holes for screws. Once the small ring is in place, tighten all screws top and bottom.

3. Turn assembly over - drop in fire bowl. Enjoy!
